WHY SHOULD WE VOTE IN INDIA

The power to vote for your country is an important part of a democratic country like India. While many in our country are eligible to cast vote, few are enthusiastic about it. In the 2019 Lok Sabha elections, the voter turnout was 67.11% which is the highest turnout in the history of India. With every election, there has been a positive increase in voter turnout. Such an increase in voting is a positive welcome, as each and every vote counts for a better future of our country.

IT'S OUR RIGHT:

India's democratic underpinnings are based on election results. Our legislatures and parliaments are elected by, for, and for the people. We are fortunate to have the constitutional right to vote. We take it for granted, but the constitution guarantees us the right to vote for whom we want and to change our minds.

PROCESS OF ELECTIONS

The Election Commission of India was established to oversee the election process and guarantee that it ran smoothly. The Election Commission is in charge of everything relating to elections, including election supervision, control, and direction, as well as election conduct. The following is an overview of the voting process that you should be aware of.

1. You first need to be registered on the Electoral Roll which is a list of eligible voters. You can apply voter id online as well as at the VRECs, at designated locations or through a Booth Level Officer.
2. You will be issued a Voter ID which you need to present at the polling booth.
3. The responsibility lies on the citizen to be aware of who is standing for elections.
4. It is also the responsibility of the citizen to find out where the polling booth is in their respective constituency.
5. You can vote on the Electronic Voting Machines.
6. If you speak only English, you should familiarize yourself with the symbols of the candidates, because the names of the candidates will be listed in alphabetical order in the respective state's language. Can also vote NOTA.
7. You will receive a mark of ink on your finger that signifies that you voted.
8. While it helps identify if you have already voted, it is also a proud symbol you can bear.

Faculties are shared the knowledge in the class itself, so students are very attentive and interactive. It was a good session for every class and all the students get the idea of importance of voting and process of voting.

It was a very interactive, interesting and informative session for students; also, students actively participated throughout the session. I would thank our management department and HOD for the support and coordination for getting this event successful.

The disease is not spread through casual contact with a person who has leprosy like shaking hands or hugging, sharing meals or sitting next to each other. Moreover, the patient stops transmitting the disease when they begin treatment.

The inmates from Sumanahalli leprosy centre addressed the stigma related to leprosy that Leprosy-related stigma is one of the oldest form of disease-related stigma known to man and, along with tuberculosis and HIV, is also the most widespread around the globe. The stigma may differ among conditions and cultural settings. For example, leprosy is often stigmatized because of the notion that the person affected has committed a sin or broken a taboo, either in this or a previous life. This stigma or taboo still remains .

The Department of Social Work organized a training session on the topic "Clothes Line Project" in collaboration with Durga India, Bengaluru on 07/12/2022. The training was conducted to observe the Day 7 theme "Youth for Gender Equality: Rights of Women, Transgender and Sexual Minorities" of Human Rights Week 2022.

The Clothesline Project is an International Campaign organized by Durga India in collaboration with Take Back The Night Foundation (USA). It aims to raise awareness on sexual assault and support voices and have a dialogue with like-minded individuals to create sensitive,

gender-equitable spaces. The Clothesline Project (CPL) is a program started to address the issue of violence against women. It is a vehicle for youth affected by violence to express their emotion by decorating a shirt. The colour of each shirt represents different types of violence.

The students were mobilized at 2.00 pm in front of the OYA Canteen, students came together in a space to address the various hardships an individual had faced in his or her life which may include sexual abuse, harassment, discrimination based on caste, creed, and so on. Students were given the opportunity to express their feelings by painting on pieces of clothes. Clothes were then hung on a clothesline to be viewed by others, and for people to stand in solidarity against the different types of abuse that people have faced/ continue to face. The key objective was to help people heal themselves and to unfurl the various forms of discrimination and side-lining of rights before the public. The purpose of the project is to increase awareness of the impact of violence and abuse, to honor a survivor's strength to continue, and to provide another avenue for them to courageously break the silence that often surrounds their experience. The program was successful in capturing the hearts of many and approximately 100 students actively took part in the training session by Durga India.
