CERTIFICATE PROGRAM

Report

Name of the Course	Certificate Program on PHP
Duration	15-03-2021 to 20-03-2021
Coordinator	Mr. Ramakrishna C. N
Number of students completed the course	145

About the course

The Department of Computer Applications organized Certificate Program on PHP from 15-03-2021 to 20-03-2021 in association with Bizotic Talent Solutions Pvt. Ltd., Bengaluru. The training program was conducted for 6 days in a combination of theory and practical sessions. Totally 30 hours of training was given by the company trainer Ms. Huma. During the sessions the trainer bridged the gap by training them in HTML, CSS then with PHP. Every day assignments, small project works were given. The program was very successful and the students were enriched by the theory and practical knowledge about PHP.

PHP is a powerful open-source scripting language made for the web that makes way for smooth web development. It is incredibly common and the most popular server-side language. PHP is built up from the C programming language and uses HTML-like tags. Popular websites like Facebook, Wikipedia, WordPress use PHP to offer their web services to billions of users.

Star PHP is an all-inclusive training program that will help learners master the skills they need to establish a successful career as a PHP developer. The program helps the learners acquire a fundamental understanding of the dynamic web development with PHP, detailing all the aspects of the scripting language from basic PHP syntax and data structure, to variables and iteration, to arrays,

loops and error handling, further to object-oriented programming concepts. Advanced concepts like connecting with databases, interacting with social networks, working with APIs and PHP application security are also discussed to give the learners a holistic view of the PHP development capabilities. This training program has been designed with a uniform structured series of modules enumerating various pertinent concepts.

Course objective

After completion of the course the students will be able to

- Use PHP's built-in server to serve static resources
- Use PHP to add some dynamic aspects to our pages
- Use HTML forms
- The difference between GET and POST requests
- Use cookies to store some data in the browser and pass it to the next request
- Use a session cookie to store data on the server instead of in the browser
- To build an authentication system
- To restructure the project
- To build a full *CRUD* interface for creating, reading, updating, and deleting tours that we will show on our website
- To upload files to the website
- To build a custom solution that catches PHP errors and exceptions and shows a proper error page for them
- Describe and test all the features you've built in this course using an automated test runner

**DEPARTMENT OF SCIENCE
CERTIFICATE PROGRAM**

Name of the Course	Certificate Program on Python Programming for Beginners
Duration	04-03-2021 to 09-03-2021
Coordinator	Prof. Ashok Kumar
Number of students completed the course	26

About the course

The Department of Science in association with Computer application department, AIGS organized a "Certificate Program on Python Programming for Beginners" from 4th to 9th March 2021 at BCA Lab, AIGS Block. The program was addressed by Mr. Ravikiran R.K Senior inhouse faculty. The Session was attended by 26 students and faculty members from Department of Science.

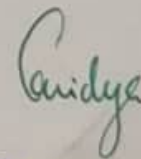

The program began with a welcome speech by Prof. Ashok Kumar.

This course presents basic topics in Python for professional programming. Each topic contains sections on logging, testing, debugging, profiling, and packaging. The course covers theory only where it will enhance programming ability. For each topic, the course presents one example, one or two new development exercises with class solutions, and one or two debugging exercises.

Course Objective

The main objective of this Python program was to introduce the audience with the beauty of Python programming language and motivate the students to enhance their programming skills. The workshop further aimed to increase the interest of the participants in other fields of computer science like web development, app development or any general-purpose applications.

After completion of the course, the students will be able to

**DEPARTMENT OF SCIENCE
CERTIFICATE PROGRAM**

- Programming tools: Microsoft VC, Git, Jupyter notebooks, pydoc
- Programming techniques: logging, testing, debugging profiling, packaging
- New techniques introduced after Python 3.8
- Details of decorators, lambdas, and comprehensions
- Why and how to use iterators and generators
- Details of advanced data structures: collections, arrays, queues, sets, dictionaries
- Network client-server: JSON, RPC, REST, and FTP
- Advanced introduction to concurrent programming: signals and timers, sub processes, multiprocessing, threads, and concurrent futures.

Course content

Module 1: Python Development Tools

- Introduction to Microsoft Visual Studio for Python 3
- Introduction to Git for Programmers
- Introduction to Python Documentation

Module 2:- Programming Techniques

- How to Use Logging
- Testing for Modification
- Debugging Techniques for Faster Programming
- Profiling
- Simple Packaging

Module 3:- Some New Techniques and Modules

- Dictionary
- String Additions
- Function Additions
- Assignment Expression, Operator, and Walrus
- Match Case Statement
- Union Operator

About Acharya

Acharya Institutes is an educational organization consisting of 11 institutes that offer specializations in various fields and foster interdisciplinary courses. Acharya Institutes is a sprawling 120 acre campus, with Bengaluru's largest Wi-Fi-enabled composite academic facility. Acharya Institutes has 15 research centers, 50 academic streams with over 100 programs. 15000 students from 75 nationalities are presently pursuing their education at Acharya Institutes.

About AIGS

Acharya Institute of Graduate Studies (AIGS) was founded in 2005, and is counted among the top graduate colleges in Bengaluru. The Institute offers Undergraduate and Postgraduate courses in a variety of subjects that include Language, Social Work, Social Sciences, Sciences, Commerce, Management, Marketing, Accounting, Fashion and Apparel Design, etc. AIGS is endowed with modern physical, technological and academic infrastructure and provides a world-class learning ambience to its students. AIGS is committed to mentoring its students beyond the prescribed curriculum aspects.

About the Department

The Department of Computer Applications was set up in 2006 with an intake capacity of 60 and the current intake is 240 students for the BCA programme, affiliated with Bangalore University. The department is reinforced by proficient and qualified teaching faculty and technical staff committed to the cause of quality education.

Bachelor of Computer Application is a three-year undergraduate degree programme that offers expertise in the field of Computer Applications. With a wide range of career prospects, BCA course is favourite amongst students.

The IT sector offers excellent job opportunities for those looking at launching their careers there as Web Developer/Designer, Software Developer, Programmer, Software Tester (Automation / Manual) and various others with a degree in BCA.

DEPARTMENT OF COMPUTER APPLICATIONS
CERTIFICATE PROGRAM

Name of the Course	Certificate Program on Advanced Python Programming
Duration	04-03-2021 to 09-03-2021
Coordinator	Prof. Ramakrishna
Number of students completed the course	319

About the course

The Department of Computer Application, AIGS organized a Certificate program on "ADVANCED PYTHON PROGRAMMING" from 4th to 9th March 2021 at BCA Lab, AIGS Block. The program was delivered by Mr. G K N Murthy who is currently working as consultant (Corporate Trainer) at PARVAM Software Company. The Session was attended by 319 students and faculty members from Department of Computer Applications.

The program begin with a welcome speech by Prof. K. Ramakrishna Reddy in the presence of Prof. Ramakrishna C.N, HOD, Department of Computer Applications and Mr. G K N Murthy on stage. Soon after the official inauguration the session was started by Mr. G K N Murthy with a brief introduction about Python, how to install python updated version. All the session was explained with suitable examples such that students will clearly understand the flow of the Python programming. At the end vote of thanks was delivered by Prof. K. Ramakrishna Reddy and the token of appreciation was handed over by Prof. Ramakrishna C N, HOD, and Department of Computer Applications along with all the faculty members.

This course presents advanced topics in Python for professional programming. Each topic contains sections on logging, testing, debugging, profiling, and packaging. The course covers theory only where it will enhance programming ability. For each topic, the course presents

one example, one or two new development exercises with class solutions, and one or two debugging exercises.

Course Objective

The main objective of this Python program was to introduce the audience with the beauty of Python programming language and motivate the students to enhance their programming skills.

The workshop further aimed to increase the interest of the participants in other fields of computer science like web development, app development or any general-purpose applications.

After completion of the course, the students will be able to

- Programming tools: Microsoft VC, Git, Jupyter notebooks, pydoc
- Programming techniques: logging, testing, debugging profiling, packaging
- New techniques introduced after Python 3.8
- Details of decorators, lambdas, and comprehensions
- Why and how to use iterators and generators
- Details of advanced data structures: collections, arrays, queues, sets, dictionaries
- Network client-server: JSON, RPC, REST, and FTP
- Advanced introduction to concurrent programming: signals and timers, sub processes, multiprocessing, threads, and concurrent futures.

Course content

Module 1: Python Development Tools

- Introduction to Microsoft Visual Studio for Python 3
- Introduction to Git for Programmers
- Introduction to Python Documentation

Module 2:- Programming Techniques

- How to Use Logging

DEPARTMENT OF COMPUTER APPLICATIONS
CERTIFICATE PROGRAM

- Testing for Modification
- Debugging Techniques for Faster Programming
- Profiling
- Simple Packaging

Module 3:- Some New Techniques and Modules

- Dictionary
- String Additions
- Function Additions
- Assignment Expression, Operator, and Walrus
- Match Case Statement
- Union Operator
- Regular Expressions

Module 4:- Decorators, Closures, Lambdas, and Comprehensions

- What Is a Decorator and Why Are They So Useful?
- Understanding How Decorators Work
- Using Decorators
- Writing a Simple Decorator
- Introduction to Closures
- Lambdas vs. Comprehensions

Module 5:- Iterators and Generators

- What are Iterators and Generators?
- System Functions That Are Iterators
- Generators
- Techniques for Using Iterators and Generators

Module 6:- Data Structures

- Collections
- Arrays
- Queues
- Sets

Module 7:- Network Client-Server

- The Need for Encoding
- Client-Server Programming RPC
- Client-Server Programming REST

Module 8:- Concurrent Programming

- What Is Concurrent Programming?
- Signals and Timers
- Working with sub processes
- Techniques of Thread Programming
- Details of Multiprocessing
- Using Concurrent Futures

The whole event was successful and it was appreciated by the students. The complete event was coordinated and executed by Prof. K. Ramakrishna Reddy and Prof. Pavithra M.N. It was a very successful event with the support extended by PRINCIPAL, HOD, students and other faculty members.

CERTIFICATE PROGRAM

Report

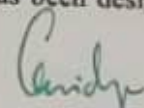

Name of the Course	STATISTICAL PACKAGE FOR SOCIAL SCIENCES
Duration	1st March 2021 to 18th March 2021
Coordinator	Mrs. Shaila. K
Number of students completed the course	125

About the course

The Certificate program was conducted for Commerce UG and PG students.

Technical skills are important for a number of reasons. They can help you work more efficiently, boost your confidence and make you a more valuable candidate for employers. Candidates who have a technical skill are often more confident when applying to certain industries than those who don't.

SPSS (Statistical Package for the Social Sciences) is a software program used by researchers in various disciplines for quantitative analysis of complex data. SPSS is one of the most popular software used by researchers widely as it has enabled academicians and researchers to obtain valuable information from the data. Basic knowledge of SPSS is vital for all users before they proceed to surveys and data analyses. Using this as a reference point, the current course is an endeavor to bridge the gap between humanities and science by complementing 'thick data' with 'big data'. In other words, the course emphasizes on the use and application of quantitative and computational methods to make better sense of the information at hand. This value added course has been designed to impart analytical and application knowledge to the students.

Report

Name of the Course	Cambridge BEC Vantage
Duration	26-02-2021 to 05-03-2021
Coordinator	Dr. Sudha. M
Number of students completed the course	198

About the course

The Department of Management at Acharya Institute of Graduate Studies had conducted Business English Classes for all first-year BBA students for 7 days from 26th Feb. 2021-05th March 2021 by Ms. Varsha Rajan at AES bock of Acharya Institutes. The students were engaged with classes from from 9am to 5pm by Ms. Varsha Rajan, Faculty of Acharya Educational Services, She gave students enough practice on the various sages involved in the examination.

With a B2 Business Vantage qualification, you show employers that you are ready to work successfully in international business. This exam could help you when applying for new jobs, getting a promotion, or developing your career.

There are three Cambridge English Qualifications for business. Each one is targeted at a different level and B2 Business Vantage is the second of these exams. The content for each exam is based on everyday work and business tasks and is designed to develop your business English skills.

- ❖ Write short business messages and reports
- ❖ Read articles from business publications
- ❖ Listen to, understand and give your opinions in meetings.

Report

Name of the Course	Jeffreys's Amazing Statistics Program (JASP)
Duration	8- February 2021 to 2-March 2021
Coordinator	Dr. Shaila K
Number of students completed the course	59

About the course

The development of skills can contribute to structural transformation and economic growth by enhancing employability and labor productivity and helping countries to become more competitive.

Technical skills are important for a number of reasons. They can help you work more efficiently, boost your confidence and make you a more valuable candidate for employers. Candidates who have a technical skill are often more confident when applying to certain industries than those who don't.

Department of Commerce (PG) organized course to final year M.com and MFA students from 8th February 2021 to 2nd March 2021. 59 Students participated in the programme. Dr.Dhanabalan T, was the resource person for this programme. Dr.Gopalkrishnan S, Head - Dept of Research and Development introduced the resource person to the students, and he also has explained the importance of this programme at the PG level.

Objectives of the Programme

JASP is a statistical program having the capable of quickly and easily generating complex statistical analyses, suitable for publication. JASP is based in C++ and R programming languages. JASP is

powerful, and able to run a variety of commonly used statistical analyses. For instance, the following includes both frequentist and Bayesian JASP capabilities: correlations, linear regressions, log-linear regressions, one sample T-Tests, independent samples T-Tests, paired samples T-Tests, ANOVA, repeated measures ANOVA, ANCOVA, binomial tests, and contingency tables (JASP Team, 2017). JASP also allows for frequentist exploratory factor analysis, principal component analysis, reliability analysis, structural equation modelling, and descriptive statistics, and can perform Bayesian summary statistics. JASP is made possible by the European Research Council, the University of Amsterdam, and the Association for Psychological Science, Utrecht University, and the Center for Open Science. Through this programme the students would get knowledge about the real-time application of this JASP is a statistical analysis in future. This certificate programme has designed and offered to the students with the following objectives;

To enable the students to define the type and quantity of data needed to process this analysis.

To Organize and summarize the research data.

To analyze the data and to draw the conclusions from it.

To assess the strengths of the conclusions and evaluating their uncertainty.

Modules have covered under This Programme

Mediation and Moderation Analysis

During and After the Course

This programme has designed as 36 hours long. Two hours have been allotted every day. For each module course materials have been supplied to the students. Meantime hands on training were also given to the students to enrich their theoretical knowledge with practical. As this the new course in this segment, students were asking many questions during the session. In the last day, at the end of this

CERTIFICATE PROGRAM

Report

Name of the Course	JAMOVI
Duration	18th January 2021 to 1st February 2021
Coordinator	Mr. Ramakrishna. C. N
Number of students completed the course	197

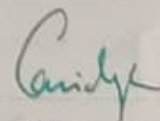

About the course

The Certificate program was conducted for BCA students from 18th Jan to 1st Feb 2021.

The development of skills can contribute to structural transformation and economic growth by enhancing employability and labor productivity and helping countries to become more competitive.

Technical skills are important for a number of reasons. They can help you work more efficiently, boost your confidence and make you a more valuable candidate for employers. Candidates who have a technical skill are often more confident when applying to certain industries than those who don't. Jamovi is to use, some of the benefits are the simple process to order your variable levels, the ability to analyze text data (rather than needing to dummy code variables), and the point-and-click method to change your reference levels in linear and logistic regression. There are also multiple modules you can install, to do more advanced statistics.

Certification course on JAMOVI was conducted from 18th January 2021 to 1st February 2021 for BCA students by Department of Computer Applications. The resource person for the event was Mr Dharmendra, M.com Ph.D, cleared NET multiple times who is an eminent personality in the area of research with vast knowledge in the field.

The program was successfully organized by Department of Computer Applications. The duration of the program was 36 hours with an objective to make the students understand the data analysis and interpretation such as graphical representation, Statistical tools etc., for the research, which will enhance the student knowledge and skill doing research. It also motivated the students to do more research paper which will improve their knowledge.

Course Objective

With the amount of statistical software out there, it's easy for grad students to be overwhelmed and just use whichever software their advisor uses or happens to be taught in their first-year statistics courses. Very rarely do we hear about software directly from the developer, who may be better able to explain the details and give answers to questions we might not have thought of yet.

Jonathon Love is a co-founder and developer of jamovi, a statistics software available for all platforms that is not only intuitive and user-friendly, but also free.

Course Content

What is Jamovi? What can it do?

Jamovi is a user friendly, open statistical spreadsheet, designed to be as simple to use as possible, but still allowing very sophisticated analyses. You can see it in the screenshot below – we have the data to the left, results on the right, and if you're running an analysis (such as an ANOVA like below) the analysis options in the middle.

Jamovi provides all the usual analyses necessary for undergraduate statistics programs (t-tests, ANOVAs, regression, contingency tables, etc.), (and it's been exciting to see a number of universities adopting it into their programs!). But it's more than an educational tool – it contains many useful features for advanced researchers too, including like linear mixed effects models, generalized linear models, and a sophisticated data transform and recoding system.

What is the difference between jamovi and SPSS?

The biggest difference between jamovi and SPSS is that jamovi is much simpler and easier to use.

In jamovi, when running an analysis, the results update as you change the options. So you can

CERTIFICATE PROGRAM**

specify your variables in say, an ANOVA, and you'll receive an ANOVA table before you click 'OK'. This lets you go on to make interactive changes to the analysis. If you want to see an effect-size, you click that checkbox, and the existing ANOVA table updates to include it. Contrast this with SPSS where you have to specify your options, press OK, and then wade through a torrent of output. If you want to change something, you have to go back and re-run the whole analysis, receiving another torrent of output. The 'direct feedback' model dramatically simplifies this whole process, and makes the learning and practice of statistics simpler and less overwhelming. There are a lot of other differences, but this is the one that people love most.

What is the difference between jamovi and R?

Jamovi is different to R in that it's a graphical statistical spreadsheet rather than a programming language, but jamovi and R are actually great friends. All the analyses in jamovi are written in R, and you can put jamovi in 'syntax mode' where it displays the equivalent R code to recreate the analyses in an R session. In fact, there's even the Rj editor for jamovi, which lets you type R code and run it directly inside the spreadsheet itself! We wanted to make it as easy as possible for people to transition from a spreadsheet to R if that's the right next step for them. So if you like the comfort of a graphical spreadsheet, but would like to take some tentative steps toward learning R, jamovi is a great place to begin.

REPORT

Department of Fashion and Apparel Design organized Certificate Course on "Traditional Hand painting Techniques". The event was inaugurated by Principal AIGS, Dr. Gurunath Rao Vaidya and Mrs. Ashwini Atul Joshi (Head, Dept. of FAD). The resource person was Mr. MuniMohan, Assistant Professor, Chitrakala Parishath, Bangalore. He taught students about traditional hand painting techniques. In this course students learnt about folk art paints of different states that is Madhubani and warli painting. The students attended 5 days Certificate course of 30 hrs, and they learnt folk art painting.

Event was held in AIGS Block. The Resource person Mr. MuniMohan taught us about the basics of Madhubani painting. The painting is a style of Indian painting, practiced in the Mithila region of the Indian subcontinent. This painting is done with a variety of tools, including fingers, twigs, brushes, nib-pens, and matchsticks and using natural dyes and pigments. It is characterized by its eye-catching geometrical patterns. There is ritual content for particular occasions, such as birth or marriage, and festivals, such as Holi, Surya Shasti, Kali Puja, Upanayana, and Durga Puja.

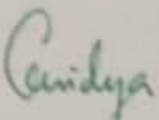

The Resource person Mr. MuniMohan taught us about the contemporary version of Madhubani painting. Madhubani paintings mostly depict people and their association with nature and scenes and deities from the ancient epics. Natural objects like the sun, the moon, and religious plants like tree of life are also widely painted, along with scenes from the royal court and social events like weddings. Generally, no space is left empty in the designs. The gaps are filled by paintings of flowers, animals, birds, and even geometric designs. Traditionally, painting was one of the skills that were passed down from generation to generation in the families of the Mithila Region, mainly by women. The Resource person Mr. MuniMohan explained and illustrated about the basics of warli painting motifs. These rudimentary wall

paintings use a set of basic geometric shapes: a circle, a triangle, and a square. These shapes are symbolic of different elements of nature. The circle and the triangle come from their observation of nature. The circle represents the sun and the moon, while the triangle is derived from mountains and pointed trees. In contrast, the square appears to be a human invention, indicating a sacred enclosure or a piece of land.

Final day of course was about Warli painting on canvas board and then the application of warli art on garments. Overall, it was an enlightening session with their knowledge and interesting things and the session was really very informative. Students had actively participated and this helped them to gain the knowledge about the "Traditional hand painting Techniques" and skill involved in that.

About the course

The Department of management at Acharya Institute of Graduate Studies had conducted a Certificate course for BBA Students on Digital Marketing from 14th to 19th September 2020.

The certifying body was Google and they covered the concepts on General marketing report, SEO marketing report template, PPC marketing report template, Social media marketing report, Template Display, Advertising Campaign Marketing report template, Ecommerce marketing report template and Email marketing report template.

Digital marketing is a valuable asset to your business's growth and helps you establish an authoritative online presence. In fact, 89 percent of marketers say methods, like search engine optimization (SEO) are successful. Additionally, methods like pay-per-click (PPC) advertising increase brand awareness as much as 80 percent.

This helped the students in Connecting with prospective environment. The most prominent reason why digital marketing has become an important tool of marketing landscape is its ability to connect with target audience instantly.

Apart from that global business is increasingly confronted with the need to participate and manage in a real-time digital environment. Hence businesses need to consider how to take advantage of

Report

Name of the Course	Certification Programme of Basics of Data Analytics Program
Duration	01/09/2020 to 18/09/2020
Coordinator	Dr. Sudha M
Number of students completed the course	312

About the Course

The Certificate Program was conducted for BBA students from 01/09/2020 to 18/09/2020.

Dr. Dharmendra .H was the resource person was the program.

Data analytics is the science of analysing raw data to make conclusions about that information. Data analytics help a business optimize its performance, perform more efficiently, maximize profit, or make more strategically-guided decisions.

The techniques and processes of data analytics have been automated into mechanical processes and algorithms that work over raw data for human consumption. Various approaches to data analytics include looking at what happened (descriptive analytics), why something happened (diagnostic analytics), what is going to happen (predictive analytics), or what should be done next (prescriptive analytics).

Data analytics relies on a variety of software tools ranging from spreadsheets, data visualization, and reporting tools, data mining programs, or open-source languages for the greatest data manipulation.

CERTIFICATE PROGRAM

This course helps the Data types and Structures, Data coercion, Data preparation: Merging, Sorting, Splitting, Aggregating, Introduction to R Libraries – How to install and invoke, Introduction to R Graph – Basic R charts – Different types of charts.

Market Basket Analysis for Product Bundling and Promotion, RFM (Recency Frequency Monetary) Analysis, Customer Segmentation using K-Means Cluster Analysis, Key Driver Analysis using Regression Model

Exploratory Data Analysis using summary table and various charts to find the insights, slicing and dicing of the Customer data. Inferential Statistics: T-Test, ANOVA, Chi-Square using marketing data and exploring relationship (Correlation).

During this session practical problems were solved make sure these students are capable of using all analysis and assignment was also rolled out to solve.

Course objectives

After completion of the course the students will be able to

Data science is one of the most alluring professions in the world. If you have keen analytical skills with a mind to play with figures, chances are great that you will make a good data engineer.

The purpose of the programme was to impart the knowledge to the students about the Data mining, and Decision modelling. The importance of the programme, and job opportunities available in the corporate world for the Data scientist Thus this programme has designed with the following objectives;

CERTIFICATE PROGRAM

- To make students familiar programming abilities.
- To enable the students demonstrate proficiency with statistical analysis of data.
- To develop the ability of the students to build and assess data-based models.
- To enable the students to execute statistical analyses with professional statistical software.
- To enable the students to be an expert in data mining and management.

Course Content Details

- ✓ The following are the course content used in this programme; Overview of Business Analytics, Visualization/ Data Issues, Introduction to Data Mining, and Introduction to Decision Modelling.
- ✓ Businesses collect customer data from many different channels, including physical retail, e-commerce, and social media. By using data analytics to create comprehensive customer profiles from this data, businesses can gain insights into customer behaviour to provide a more personalized experience
- ✓ Organizations can improve operational efficiency through data analytics. Gathering and analysing data about the supply chain can show where production delays or bottlenecks originate and help predict where future problems may arise. If a demand forecast shows that a specific vendor won't be able to handle the volume required for the holiday season, an enterprise could supplement or replace this vendor to avoid production delays.

The program was very beneficial for the students.

Report

Name of the Course	SOFT SKILL DEVELOPMENT
Duration	17.8.2020 to 21.8.2020
Coordinator	Ms. Parimala
Number of students completed the course	117

About The Course:

The Value-added course on Soft-skill development was done for BA & BBA Aviation students.

The development of skills can contribute to structural transformation and economic growth by enhancing employability and labor productivity and helping countries to become more competitive.

Skills and knowledge inculcated beyond curriculum education is necessary to succeed in today's world. Our college believes in nurturing the students into a wholesome professional and hence our students are encouraged to undergo Value Added Courses. These courses develop in them an urge to keep them updated on the latest trends and improves their technical skills further.

This value-added course will enhance students to overcome the difficulties involved and explore some techniques for making their speeches as impressive as possible. Public speaking involves talking in front of a group of people, usually with some preparation. It can be in front of people that you know (e.g. at a family celebration) or a crowd of strangers. Unlike a presentation there normally isn't a lot of opportunity for interaction between the audience and the speaker – the speaker speaks, and the audience (hopefully) listens.

The Department of Aviation Management and Arts together had organised the "VALUE ADDED COURSE ON SOFT SKILL DEVELOPMENT" of for BA & BBA Aviation students. The faculty Ms.Parimala, ,Assistant Professor,Department of Aviation Management was the event coordinator. The resource person was Ms.Ranisha,Assistant Professor,Department of English,AIGS. It was 30 hrs Program from 17.8.2020 to 21.8.2020.The main objective of this course is to teach how they need to face interview, importance of Resume and so on.

Soft skills are character traits and interpersonal skills that characterize a person's relationships with other people. In the workplace, soft skills are considered to be a complement to hard skills, which refer to a person's knowledge and occupational skills. Sociologists may use the term "soft skills" to describe a person's emotional intelligence quotient (EQ) as opposed to intelligence quotient (IQ).

Soft skills have more to do with who people are than what they know. As such, they encompass the character traits that decide how well one interacts with others and usually are a definite part of an individual's personality. In a competitive labor market, employees who demonstrate that they have a good combination of hard and soft skills often see a greater demand for their services.

Soft skills include attributes and personality traits that help employees interact with others and succeed in the workplace.

Examples of soft skills include the ability to communicate with prospective clients, mentor your co-workers, lead a team, negotiate a contract, follow instructions, and get a job done on time.Hard skills are measurable and usually obtained through formal education and training programs.Workers with good soft skills can help companies achieve higher levels of efficiency and productivity.In contrast to hard skills, soft skills are more difficult to acquire through training. Soft skills are the combination of people skills, social skills, communication skills, emotional intelligence, and personality traits that make it easy to get along and work harmoniously with other people.Soft skills are unlike hard skills in that they require situational awareness to know when to use which skill. When you're hired for an accounting job, you know that most days you'll need to

VALUE ADDED COURSE

the do hard skills you learned in school like mathematical formulas, bookkeeping, and probably some work in a spreadsheet application. However, it's not as cut and dry when you'll use soft skills because they are dependent upon intangible factors.

We started the session with welcoming all te students by giving welcome speech from Monika 3rd Sem BBA Av , then Siddhu Raj 3rd Sem BBA AV he introduced the Guest to the students.

The resourse person started with importance of Soft skill ,how well we can communicate in work place, differece between CV & Resume,what should be there in the resume along with that she gave some assignment to students.

She also mentioned how effectively they can attend the interview,how they should introduce them self and how to give good impression along with that about posture and gecture how to draft a mail and to write a report. They we concluded the session of giving vote of thanks by Claudius 3rd Sem BBA AV.

The overall Feedback about course was Excellent.

Report

Name of the Course	Certificate Course on Basic MS Excel Level-2
Duration	03/06/2020 to 18/06/2020
Coordinator	Mrs. Lakshmi. V
Number of students completed the course	86

About the course

The Certificate Course Basics of MS Excel level-2 was conducted for Commerce students. The event was from 3rd June to 18th June 2020.

Dr. Sasikala, Asst. Professor, AIGS was the resource person for the event.

Microsoft Excel is powerful data visualization and analysis software, which uses spreadsheets to store, organize, and track data sets with formulas and functions. Excel is used by marketers, accountants, data analysts, and other professionals. It's part of the Microsoft Office suite of products. Alternatives include Google Sheets and Numbers.

Excel is primarily used for creating financial documents because of its strong computational powers. You'll often find the software in accounting offices and teams because it allows accountants to automatically see sums, averages, and totals. With Excel, they can easily make sense of their business' data.

Excel is an incredibly powerful tool for getting meaning out of vast amounts of data. But it also works really well for simple calculations and tracking almost any kind of

information. The key for unlocking all that potential is the grid of cells. Cells can contain numbers, text, or formulas. You put data in your cells and group them in rows and columns. That allows you to add up your data, sort and filter it, put it in tables, and build great-looking charts. Let's go through the basic steps to get you started.

Excel is certainly the most used tool in financial departments to reprocess data. The possibilities offered by the spreadsheet make it possible to meet the main needs of accountants, controllers, auditors and financiers. However, this tool is complex and many employees do not know the functions that can allow them to process data quickly or new developments.

The main features of MS Excel include inserting a pivot table, sorting of tabulated data, adding formulas to the sheet, and calculating large data.

This course aims to provide skills and knowledge which will allow the attendee to Learn MS Excel tools, Techniques and create lookup functions, set Excel working options, enhance charts, protect worksheet data, perform advanced data operations using summarising, PivotTables, data consolidations, goal seeking, and Solver, and create and use macros.

Easy data entry and operations: One of the main advantages of MS excel is that it facilitates smooth and easy data entry. Compared to any other data entry and analysing tools, MS Excel offers features like Ribbon interface, a set of commands used to perform certain operations. Ribbon consists of many tabs, which again consist of many command groups and their buttons. You can select the commands by clicking the related button and perform operations very easily.
